SUMMARY

AI & Data Science student skilled in PySpark pipelines, deep learning, NLP (Transformers), and scalable machine learning systems. Experienced in multimodal AI, large-scale data processing, predictive modeling, and real-time intelligent applications. Passionate about ML Engineering, LLM-based systems, and applied AI development.

PROJECT

Big Data Analysis with PySpark

- Processed **25M+ MovieLens records** by building distributed pipelines improving runtime by **40%** compared to baseline.
- Implemented **K-Means clustering, classification & regression** models to predict movie trends and user behavior.
- Designed reusable ETL components for large-scale batch processing.

Disease Prediction System

- Developed a symptom-based disease prediction system using multiple ML algorithms.
- Achieved high prediction accuracy through model comparison and feature optimization.
- Built a user-friendly interface enabling quick and early diagnosis support.

NPC Deep Learning Intelligence

- Built deep-learning-based NPC behavior models enabling adaptive, real-time gameplay interactions.
- Implemented neural network architectures to enhance NPC decision-making and game environment realism.
- Created dynamic response mechanisms using NLP for immersive player-NPC engagement.

Multimodal Emotion Recognition Chatbot (Research Project)

- Co-developed a multimodal chatbot combining **text, speech, and facial emotion recognition**.
- Achieved **89.6% accuracy** through early-late fusion of NLP, SER, and FER embeddings.
- Fine-tuned LLM responses using DAIC-WOZ to generate empathetic, therapist-style conversation patterns.
- Conducted evaluation through confusion matrices, ablation studies, and training dynamics.

EDUCATION

B. E in Artificial Intelligence and Data Science

BMS College Of Engineering • Bengaluru, Karnataka • Dec. 2022-Aug. 2026

12th

Sharnbasveshwar Residential PU College • Kalaburagi, Karnataka • 2020-2021

10th

Sharnbasveshwar Residential Public School • Kalaburagi, Karnataka • 2018-2019

INVOLVEMENT

Treasurer

BMSCE • VarAInce • November 2023 – May 2025

- Organized workshops, hackathons, and expert-led seminars to foster AI/DS learning.
- Strengthened leadership, communication, and team coordination through student-led initiatives.

SKILLS

Programming: Python, R, SQL, C, C++

Core CS Concepts: Object-Oriented Programming (OOPs), Data Structures & Algorithms

ML/DL: Scikit-learn, TensorFlow, PyTorch, Transformers

Big Data: PySpark, Spark MLlib, MongoDB, Cassandra

Data Tools: Pandas, NumPy, Data Visualization (Matplotlib/Seaborn)

Other: Time Series Analysis, NLP, Data Mining

Soft Skills: Active Listening, Communication Skills, Team Collaboration
